SUMMARY

Results-driven Computer Science graduate with hands-on experience building and shipping production Python applications. Proficient in Git, Docker, and CI/CD pipelines. Maintain 11 public GitHub repositories with well-documented codebases. Built production-grade AI systems including an autonomous content pipeline and an LLM-powered agent with 32+ tools. Experienced in understanding, modifying, and testing complex codebases. Active open-source contributor.

PROFESSIONAL EXPERIENCE

Operations Associate - DMart (Avenue Supermarts Ltd)

Feb 2024 - Nov 2025

Mumbai, India

- Processed 500+ daily transactions with 0% error rate, maintaining complete database accuracy across billing systems
- Executed complex inventory and billing workflows following strict SOPs, ensuring 100% database integrity
- Resolved high-pressure customer and stakeholder queries, building strong analytical and communication skills

Research & Data Intelligence Specialist - Independent

Dec 2025 - Present

Mumbai, India

- Built structured research methodologies for identifying and qualifying digital assets and partnership opportunities
- Designed Google Sheets dashboards for tracking competitor metrics and delivering actionable market intelligence

TECHNICAL PROJECTS

AutoShorts - AI Content Automation Engine

Python, Groq, FFmpeg, YouTube API

- Built fully autonomous pipeline: LLM script generation -> quality validation -> TTS synthesis -> video assembly -> YouTube upload
- Designed SQLite deduplication engine with topic/clip cooldowns; runs 4 videos/day with zero intervention
- Managed via Git version control with feature branches; deployed using Docker containers and cron-based CI/CD

ClawBot - Autonomous AI Mac Agent

Python, LLM Agent, Telegram API

- Engineered AI agent with 32+ tools for system control, trading, messaging, and file management via Telegram
- Implemented LLM tool-calling architecture with JSON reasoning chain, multi-tool chaining, and security layer
- Wrote unit tests for tool handlers; managed complex multi-module codebase with Git branching workflow

EAHP - Emergency Ambulance Hiring Portal

Next.js, React, Supabase, Leaflet.js

- Developed full-stack platform with real-time GPS tracking, admin RBAC dashboard, and PDF report generation
- Migrated legacy PHP/MySQL monolith to modern Next.js + Supabase stack with auth middleware

TaskFlow - Production REST API

FastAPI, JWT, SQLite, Swagger

- Production REST API with JWT auth, token rotation, role-based access control, filtering, pagination, and OpenAPI docs

CryptoWatch - Crypto Dashboard

Python, Flask, CoinGecko API

- Real-time dashboard tracking 50+ crypto assets with charts, portfolio calculator, and email price alerts

TECHNICAL SKILLS

Languages:	Python, JavaScript, PHP, C#, SQL, Bash, HTML/CSS
AI:	LLM Prompt Engineering, Groq API, Ollama, Edge-TTS, FFmpeg, AI Agents, n8n
Web:	FastAPI, Flask, React.js, Next.js, REST API Design, Supabase, JWT Authentication
Databases:	SQLite, MySQL, PostgreSQL (Supabase)
DevOps:	Git, GitHub (11 public repos), Docker, CI/CD Pipelines, Cron Automation, VS Code, Vercel
Testing:	pytest, Unit Testing, API Testing, Code Review, Complex Codebase Navigation
Office:	Excel (Pivot Tables, VLOOKUP), Word, PowerPoint, Google Sheets
Soft:	Problem Solving, Analytical Thinking, Technical Writing, Independent Remote Work

EDUCATION

Bachelor of Science (BSc) in Computer Science

2023 - 2026

Sheth L.U.J College of Arts & Sir M.V. College of Science & Commerce, Mumbai

HSC (12th) - Science

2022

V.P.M.'s Valia College of Arts, Commerce & Science, Mumbai

ADDITIONAL

Languages:	English (Professional), Hindi (Fluent), Marathi (Native)
Open Source:	11 public GitHub repos - github.com/ansariazad Active contributor with 200+ commits
Portfolio:	ansariazad.github.io - 8 live projects with full source code and documentation
Available:	Immediate joiner - Open to Full-time, Part-time, Remote, and Internship roles
